Initiate coverage at BUY and W80,000 target price

We initiate coverage of Pumtech Korea at BUY and target price of W80,000. Our target price was derived by applying a 17x target P/E to 12-month-forward EPS. This is the average 12-month-forward P/E from May to August 2025, when expectations for K-beauty exports and the company's earnings growth began to build.

Growth in the core pump business remains strong. We forecast 3Q26 consolidated revenue at W123.0bn (+26% YoY) and OP at W23.1bn (+51% YoY), with OP beating the W20.5bn market consensus. Orders are increasing across existing indie brands and new customers, rather than being concentrated at one large customer. We expect revenue at Bukuk T&C, which has high exposure to sun care products, to decline from W30.1bn in 2Q to W26.0bn in 3Q as seasonal demand eases. Pump business growth should more than offset the decline.

Investment highlights: more capacity and global client diversification

The key investment points for the company are: easing bottleneck through preemptive capacity expansion, expanding the global customer base, and operating a high-margin business structure centered on pre-mold designs. Following the completion of Plant 4, production facilities at Plant 6 are sequentially coming online, and the Plant 7 land site is already secured. As production capacity for injection molding and assembly increases, deferred order backlogs and new orders should translate into sales.

The company became the largest domestic cosmetics container manufacturer in 2023, with its market share expanding from 20.9% in 2020 to 24.5% in 2025.

The client mix is also expanding from domestic indie brands to global multinational corporations (MNCs). New product launches and repeat orders from global customers are broadening the product range, supported by development capabilities in grinder, stick-type, and eco-friendly packaging.

Its internally developed pre-molds reduce initial capex and development time for clients, while lowering the company's development expense burdens as the same pre-mold can be used to serve multiple clients. As repeat orders accumulate, sales from using existing pre-molds expand structurally. We estimate the pre-mold sales share to reach 77% this year.

Ⅰ. Target price and 3Q26 preview

1. Initiate coverage at BUY and W80,000 target price

We initiate coverage of Pumtech Korea at BUY and target price of W80,000. Our target price was derived by applying a 17x target P/E to 12-month-forward EPS. This is the average 12-month-forward P/E from May to August 2025, when expectations for K-beauty exports and the company's earnings growth began to build.

The consolidated business comprises pumps, tubes, and health functional foods. Pumtech Korea and PT Plas operate the pump business, while Bukuk T&C and Miratech operate the tube business. Bukuk T&C has more than 50 years of experience manufacturing aluminum, PE, polyfoil, and laminate tubes. As of 2Q26, cosmetics tubes accounted for 75% of its product mix, household-product tubes for 17%, and other tubes, including pharmaceutical tubes, for 8%.

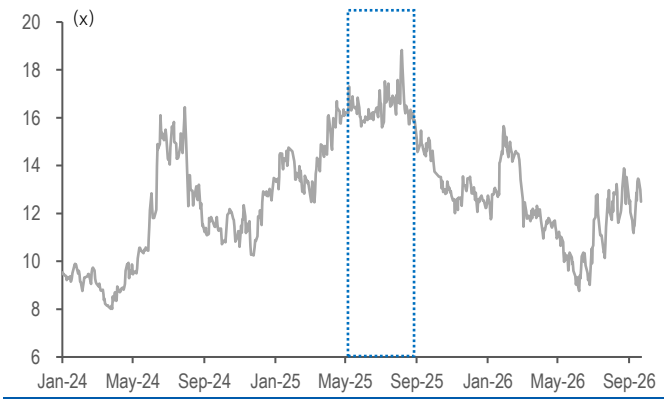

PHB Korea and Windlab operate the health functional foods business. PHB Korea distributes and sells health functional foods, functional cosmetics, and household products. Windlab runs group-buying and commerce businesses through a network of approximately 1,000 influencers. E-commerce retailer Tepstone Company was added to the consolidated group in 1H26.

2. 3Q26 preview: OP likely to miss consensus

We forecast 3Q26 revenue at W123.0bn (+26% YoY) and OP at W23.1bn (+51% YoY), with OP exceeding the W20.5bn market consensus. We forecast 3Q26 revenue at W123.0bn (+26% YoY) and OP at W23.1bn (+51% YoY), with OP exceeding the W20.5bn market consensus.

Growth in the pump business should offset a seasonal decline in the tube business, which has high exposure to sun-care products. Orders appear to be rising across the customer base, with growth coming from both existing indie brands and new customers. We estimate pump business revenue will increase from W88.1bn in 2Q to W97.6bn in 3Q.

Reflecting lower seasonal demand for sun care products, we forecast Bukuk T&C revenue to decline from W30.1bn in 2Q to W26.0bn in 3Q.

Ⅱ. Investment highlights

1. Proactive capacity expansion strengthens market leadership

Pumtech Korea is investing in production facilities ahead of demand while utilization remains high. We expect annual production capacity to rise from 652mn units in 2024 to 768mn in 2025 and 828mn in 2026. Over the same period, production volume is expected to increase from 531mn to 690mn units, lifting utilization from 81.4% to 83.3%. Rising utilization despite added capacity points to firm demand and the need for further expansion.

After completing Plant 4 in November 2025, the company has been investing in Plants 6 and 7 in stages. Total investment in Plant 6, including land and buildings, is W24.0bn; the project was 54% complete as of end-June 2026. Once Plant 6 reaches normal operations, it should ease bottlenecks on existing lines and improve the company's ability to convert growing orders into revenue. The company has also secured a 3,617㎡ site for Plant 7, which should serve as a mid- to long-term production base as demand grows.

Capacity expansion is translating directly into enhanced market dominance. Among major domestic cosmetics container manufacturers, the company's revenue expanded from W195.2bn in 2020 to W351.6bn in 2025, representing a CAGR of 12.5%. Over the same period, market share grew by 3.6%p from 20.9% to 24.5%, establishing the company as the domestic market leader since 2023. In 2025, the market share gap over the second-place player widened to 7.8%p.

The normalized operation of Plant 6 and future additions at Plant 7 will likely ease bottlenecks while laying the base to respond to new clients and product orders. Driven by high utilization and preemptive capex expansion, the company's market share gains in the domestic container market will likely continue.

Pumtech Korea: production facilities, capacity, output, and utilization

Plant 1: compact & dropper assembly lines, pump container assembly lines
Plant 2: pump engine & mist assembly lines; injection molding lines
Plant 3: pump-tube & stick assembly lines
Plant 4 (new): post-processing lines (printing/metallization/coating); stick assembly lines; injection molding lines; cleanroom
Plant 5: labeling lines; warehouse
Plant 6 (new): scheduled for completion in 2H26

2. Qualitative growth driven by global client expansion and in-house pre-mold tooling competitiveness

The company's customer base is expanding from domestic indie brands to global MNCs. As new product launches and repeat orders of existing products from global MNCs accelerate recently, the mix of orders is also diversifying. The company's fast R&D capabilities that respond swiftly to changing market trends including grinder containers that shave solid formulations, portable stick dispensers, and eco-friendly mono-material/PCR recycled plastic packaging continue to support new client acquisitions.

The company categorizes internally developed, proprietary molds as "pre-molds" and custom tooling tailored to specific client requests as "custom molds." Using pre-molds allows customers to reduce initial tooling capex and shorten lead times. The company can lower R&D expense burdens and raise profitability by using a single mold across multiple client lines. We expect the sales contribution from pre-molds to reach 77% in 2026.

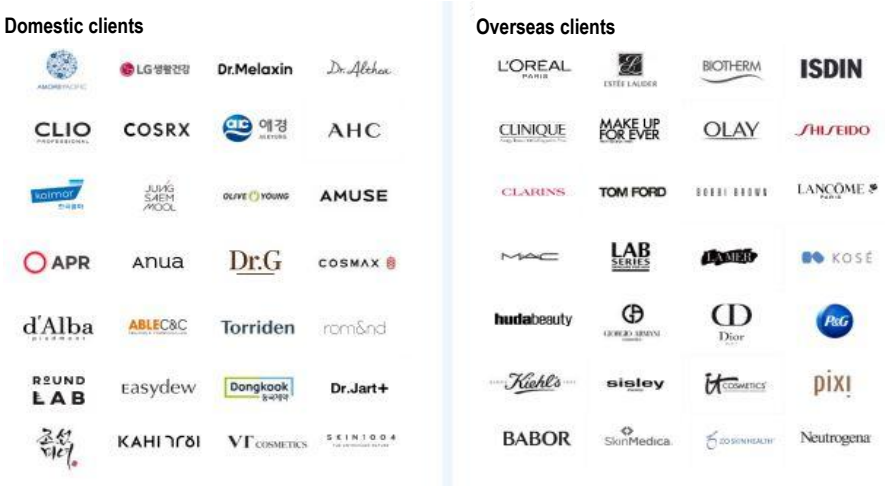

This pre-mold-centric business model is proven by high OPMs. The company's 2025 OPM of 15.2% was far above the second largest domestic container maker's OPM of 0.1%, and was still higher than the domestic entity OPM of top-three Korean cosmetics ODMs (10.1-12.5%). Even considering differences in business structure, a container manufacturer outperforming major ODMs in OPM is noteworthy. Global client expansion is driving top-line growth, while repeat orders and high pre-mold exposures translate that scale directly into bottom-line growth.

Analyst certification

I/We, as the research analyst/analysts who prepared this research report, do hereby certify that the views expressed in this report accurately reflect my/our personal views about the subject securities discussed in this report.

Stock and sector ratings

- **Stock ratings** include an Investment Rating (Strong Buy, Buy, Hold, Sell) based on the expected absolute return of a stock over the next 6 -12 months.
- **- Strong Buy:** Expected to return 30% or more
  - Buy: Expected to return between 15% and 30%
  - Hold: Expected to return between -15 and +15%
  - Sell: Expected to return -15% or less
- **Sector ratings** suggest 6 to 12 - month forward investment weighting of a given sector compared to its market capitalization weighting.
  - Overweight: Investment weighting is higher than the market capitalization weighting
  - Neutral: Investment weighting is equal to the market capitalization weighting
  - Underweight: Investment weighting is lower than the market capitalization weighting

Global disclosures & disclaimers

This research report has been prepared for informational purposes only; it does not constitute an offer or a solicitation of an offer to buy or sell any securities or other financial instruments. The information and data contained in this report have been obtained from sources we consider reliable; however, we make no representation that the information provided in this report is accurate or complete, and it should not be relied on as such. The recipient of this report should use his/her independent judgment regarding the sale or purchase of any securities or financial instruments mentioned herein. We disclaim any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents. This report is for our clients only. It is copyrighted material and may not be reproduced, transmitted, quoted, or distributed in any manner without the prior written consent of Yuanta Securities Korea Co., Ltd.

As of the date of publication of this report, Yuanta Securities Korea Co., Ltd. does not own 1% or more of the subject company's shares outstanding. As of the date of publication of this report, Yuanta Securities Korea Co., Ltd. does not have any special interests in the subject company.

The material contained herein was not disclosed by Yuanta Securities Korea Co., Ltd. to any institutional investors or third parties prior to its publication. The analyst (s) of this report or the analyst (s)' spouse does not have any financial interest in the securities of the subject company (ies) mentioned herein, nor financial interest of any nature related to the subject company (ies) (including without limitation, whether it consists of any option, right, warrant, future, long or short position), as of the publication date of this report.

NOTICE TO US INVESTORS: This research report is the product of Yuanta Securities Korea Co., Ltd., which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (US) and are not associated person(s) of any US regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a US broker-dealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with US rules or regulations regarding, among other things, communications with a subject company, public appearances, and trading securities held by a research analyst account.

Research reports are intended for distribution only to Major U.S. Institutional Investors as defined by Rule 15a-6(b)(4) of the US Securities and Exchange Act of 1934 (the Exchange Act) and interpretations thereof by the U.S. Securities and Exchange Commission (SEC) in reliance on Rule 15a-6(a)(2). If the recipient of this research report is not a Major US Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated, and/or transmitted onward to any US person which is not a Major US Institutional Investor. In reliance on the exemption from registration provided by Rule 15a-6 of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major US Institutional Investors, Yuanta Securities Korea Co., Ltd. has entered into a Strategic Partnership and chaperoning agreement with a U.S. registered broker-dealer: BancTrust Securities USA. Transactions in securities discussed in this research report should be affected through BancTrust Securities USA.
