Maintain BUY and target price of W205,000

We maintain BUY and target price of W205,000. We attribute the share price weakness since early April to a lack of news flow across the nuclear power sector and broad delays in the company's order pipeline. However, these delays stem from slower progress in signing PPAs and securing financing; the pipeline has not disappeared and is, in fact, becoming more diversified. We therefore continue to believe the company is in a phase similar to the period when expectations were building for the UAE nuclear power plant order, which underpins our target P/B of 2.3x. During that period, the stock traded at an average 12-month forward P/B of 1.8x. We also retain the 30% premium to the 1.8x multiple for the company's partnership with Westinghouse and the 5% discount applied to the BPS increase from the asset revaluation in 1Q26. Accordingly, we maintain our target price.

Unrivaled nuclear all-rounder

Hyundai E&C has secured preferential EPC rights for up to eight TerraPower SMRs under a framework agreement signed on Aug 18 and appears to be pursuing the construction contract for Kemmerer Unit 1, the first-of-a-kind reactor. The company has pipelines with both Team Korea and Westinghouse in large-scale nuclear power plants, as well as partnerships involving both generation 3.5 (Holtec) and generation 4 (TerraPower) SMRs. It therefore has the broadest nuclear power pipeline in the construction sector and, in our view, the highest upside potential among our coverage. A partial contract for the Palisades SMR project, being pursued in partnership with Holtec, is expected in 2H26. The second ESC contract for Bulgaria's AP1000 large-scale nuclear power project is also expected in 2H26.

Data centers and offshore wind add to order pipeline

Order wins are also expected in data centers and offshore wind. In 2H26, the company is expected to secure two data center projects worth an estimated total of more than W1tn, as well as the Wando offshore wind project, estimated at approximately W1.2tn. We believe its full-year consolidated order guidance of W33.4tn is readily achievable. Hyundai E&C is expected to undertake a large share of the overall design work for the Saemangeum project. The company will likely be responsible for the AI data center, while Hyundai Engineering will handle the solar power facilities. Additional offshore wind projects are expected to enter the pipeline next year, and their high profitability should help improve margins in the civil engineering division.

For analyst certification and other important disclosures, refer to the Appendix at the end of this report.

I. Target price and valuation

Maintain BUY and target price of W205,000

We maintain BUY and target price of W205,000 for Hyundai E&C. Our target price is based on a target P/B of 2.3x applied to 12-month forward BPS. The starting point for this multiple is the company's average 12-month forward P/B of 1.8x from late December 2009, when Team Korea won the contract for the UAE's Barakah Units 1-4, to early March 2011, immediately before the Fukushima nuclear accident. We apply a 30% premium for the company's partnership with Westinghouse, resulting in a target P/B of 2.3x. Although we have made some adjustments to our earnings estimates, the resulting valuation does not differ materially from our previous target price, which we therefore maintain.

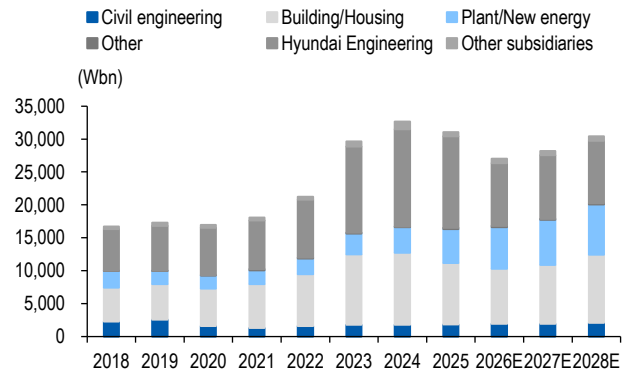

We estimate ROE at 5.7% in 2026 and 6.9% in 2027. BPS is projected to increase from W84,428 in 2026 to W89,651 in 2027 and W95,795 in 2028. As BPS increased substantially following the asset revaluation in 1Q26, we apply a 5% discount to the revaluation-driven increase when calculating our target BPS.

How should we view the share-price correction since April?

Hyundai E&C's share price fell 33.9% from W188,700 on Apr 8 to W124,800 on Sep 18. We attribute the correction to two factors: a lack of news flow across the nuclear power sector and broad delays in the company's order pipeline.

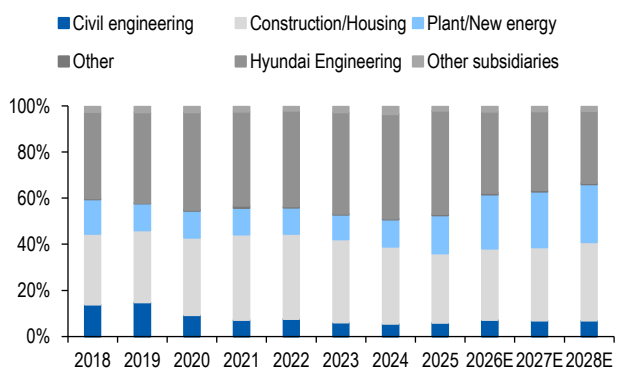

We believe the direct causes of these delays are slower progress in signing PPAs and securing financing. The Palisades SMR project with Holtec (generation 3.5) and Bulgaria's AP1000 large-scale nuclear power project with Westinghouse, and Fermi America's Project Matador all appear to have been delayed. However, the pipeline itself expanded over the same period. In August, the company signed a framework agreement with TerraPower, extending its partnerships to Generation 4 SMRs. This also supports our decision to retain the target multiple.

II. Earnings estimates

2026: lower revenue but higher earnings

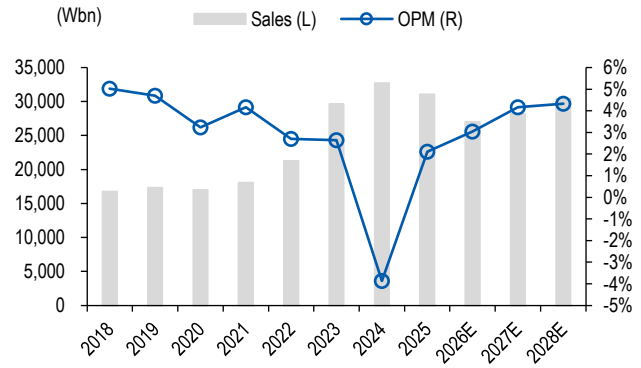

We estimate 2026 consolidated revenue at W27tn (-13.1% YoY) and OP at W820.2bn (+25.6% YoY; 3.0% OP margin). For 2027, we expect both revenue and OP to grow, with revenue reaching W28tn (+4.4% YoY) and OP W1.176tn (+43.4% YoY; 4.2% OP margin).

1H26 OP came in ahead of the company's plan. Consolidated revenue totaled W13.1tn and OP W442.7bn in 1H26, representing 47.9% and 55.3%, respectively, of the company's full-year guidance (W27.4tn of consolidated revenue and W800.0bn of OP).

Parent-only earnings to increase in 2027

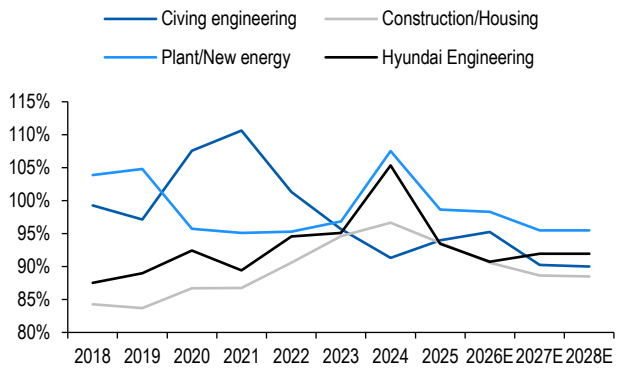

We forecast Hyundai E&C's parent-only OP to increase by W470.3bn, from W433.8bn in 2026 to W904.1bn in 2027. The parent-only OP margin is projected to rise from 2.6% to 5.1%, while the gross margin should improve from 6.5% to 9.0%, driven by lower housing construction costs. The parent-only cost-to-sales ratio improved 1.1%p YoY to 94.0% in 1H26, while the building and housing cost-to-sales ratio improved 4.3%p to 90.8%. Projects with high construction costs that commenced in 2021-2022 accounted for 26% of revenue, down from 54%, and we expect most of these projects to be phased out by early 2027.

III. Investment highlights

1. Nuclear power: Exposure across the entire pipeline

Hyundai E&C has built 24 of Korea's 36 domestically designed nuclear reactors. In December 2023, it won the main equipment construction contract for Shin Hanul Units 3 and 4. Of the total contract value of W3.1196tn, Hyundai E&C's share is W1.7157tn, reflecting its 55% stake and role as lead contractor. The project was 29.8% complete as of May 2026.

For SMRs, the company has secured exclusive global SMR EPC rights through its agreement with Holtec, covering three sites. A partial contract for the Palisades SMR project in the US is expected in 2H26, followed by the main contract in 2027. The company targets EPC contracts in 2028 for Oyster Creek in the US, a site owned by Holtec, and in 2031 for Cottam in the UK, a site owned by EDF.

Hyundai E&C signed a framework agreement with TerraPower in August 2026 and was selected as the exclusive EPC partner for its Generation 4 sodium-cooled fast reactor (SFR). For Kemmerer Unit 1 in Wyoming, the first-of-a-kind reactor, we expect Hyundai E&C to seek to replace the provisional EPC contractor and undertake the EPC scope itself. Kemmerer Unit 1 became the first SMR to receive a construction permit from the US Nuclear Regulatory Commission in March 2026, and the EPC contract is targeted for 2027. For subsequent reactors, Hyundai E&C has secured exclusive EPC rights for up to eight units, as well as exclusive EPC rights for jointly developed projects. It is the only company in our coverage to have secured EPC positions in both Generation III+ pressurized water reactors and Generation IV sodium-cooled fast reactors.

Its large-scale nuclear power pipeline has two pillars: Team Korea, led by Korea Hydro & Nuclear Power and KEPCO, and its partnership with Westinghouse. Hyundai E&C has signed country-specific teaming agreements with Westinghouse covering European markets. For Units 7 and 8 at Bulgaria's Kozloduy nuclear power plant, the company signed the first engineering services contract in November 2024. We expect the second contract to be signed in 2H26 and the main EPC contract to be awarded in 2027. In the US, Hyundai E&C signed a FEED contract with Fermi America in October 2025 for four AP1000 reactors under Project Matador. The main EPC contract is expected to be signed after the PPA is concluded.

2. Data centers and offshore wind: 2H26 is the confirmation phase

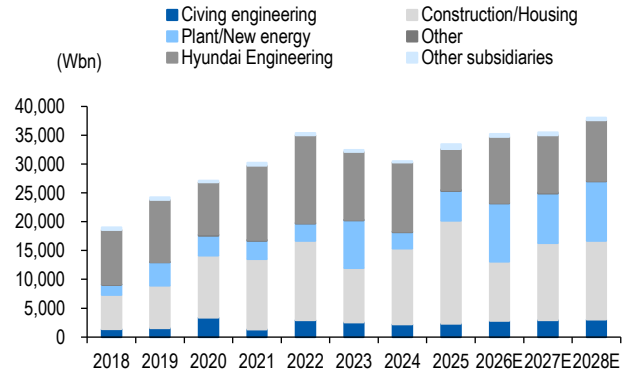

Hyundai E&C is expected to win two data center projects in 2H26, with their combined value estimated at more than W1tn. For the Saemangeum project, the division of responsibilities has been finalized, with Hyundai E&C handling the AI data center and Hyundai Engineering the solar power facilities. The remaining scope is still under discussion.

In offshore wind, the company has secured the Shinan-Ui project. Hyundai E&C's share is W668.4bn, with construction scheduled from January 2026 to June 2029. Hyundai Engineering & Steel Industries separately secured a W611.5bn contract, bringing the group's combined contract value to approximately W1.28tn. Hyundai E&C was selected as the preferred bidder for the Wando-Geumil offshore wind project in 4Q25. We expect the company to secure an order worth approximately W1.2tn around November.

3. Core operations: normalizing parent-only costs and maintaining the No. 1 position in urban redevelopment

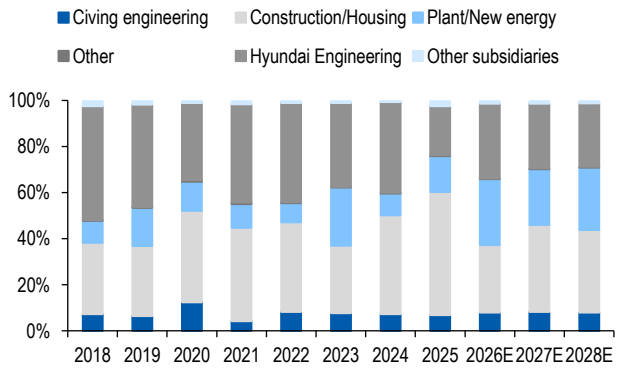

The share of urban redevelopment projects in revenue increased from 36% at end-2025 to 54% at end-2Q26. Urban redevelopment orders reached W10.51tn in 2025, exceeding W10tn annually for the first time in the industry's history and securing Hyundai E&C the No. 1 position for the seventh consecutive year. The total comprised 11 projects, including W2.75tn for Apgujeong District 2, W1.96tn for Sutaek-dong in Guri, and W1.51tn for Gaepo Jugong Complexes 6 and 7. Mixed-use developments secured in 2025 included approximately W1.63tn for Magok The Grid and W1.19tn for the former Hilton Seoul site. This year, the company has won major projects including Apgujeong District 3 (worth W5.6tn) and District 5 (worth W1.5tn). Its urban redevelopment orders reached W8tn as of September, keeping Hyundai E&C in the No. 1 position as of September 2026.

ROE (%)	**-2.1**	**4.6**	**5.7**	**6.9**	**7.5**
Debt-to-equity (%)	179.3	174.8	140.8	135.6	133.0
Net debt-to-equity (%)	-28.0	-20.7	-28.4	-34.1	-41.4
OP/financing cost (x)	-12.6	5.3	4.3	5.9	6.5

Note: CI = controlling interest
Operating profit calculation same as K-GAAP (sales - COGS - SG&A exp)
EPS, BPS, P/E and P/B are based on controlling interest
For valuation metrics such as P/E, historical figures are based on annual average prices and estimates, on current price
For ROA or ROE, assets and equity are averages of end-of-year figures for the given year and the year prior

Analyst certification

I/We, as the research analyst/analysts who prepared this research report, do hereby certify that the views expressed in this report accurately reflect my/our personal views about the subject securities discussed in this report.

Stock and sector ratings

- **Stock ratings** include an Investment Rating (Strong Buy, Buy, Hold, Sell) based on the expected absolute return of a stock over the next 6 -12 months.
- **- Strong Buy:** Expected to return 30% or more
  - Buy: Expected to return between 15% and 30%
  - Hold: Expected to return between -15 and +15%
  - Sell: Expected to return -15% or less
- **Sector ratings** suggest 6 to 12 - month forward investment weighting of a given sector compared to its market capitalization weighting.
  - Overweight: Investment weighting is higher than the market capitalization weighting
  - Neutral: Investment weighting is equal to the market capitalization weighting
  - Underweight: Investment weighting is lower than the market capitalization weighting

Global disclosures & disclaimers

This research report has been prepared for informational purposes only; it does not constitute an offer or a solicitation of an offer to buy or sell any securities or other financial instruments. The information and data contained in this report have been obtained from sources we consider reliable; however, we make no representation that the information provided in this report is accurate or complete, and it should not be relied on as such. The recipient of this report should use his/her independent judgment regarding the sale or purchase of any securities or financial instruments mentioned herein. We disclaim any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents. This report is for our clients only. It is copyrighted material and may not be reproduced, transmitted, quoted, or distributed in any manner without the prior written consent of Yuanta Securities Korea Co., Ltd.

As of the date of publication of this report, Yuanta Securities Korea Co., Ltd. does not own 1% or more of the subject company's shares outstanding. As of the date of publication of this report, Yuanta Securities Korea Co., Ltd. does not have any special interests in the subject company.

The material contained herein was not disclosed by Yuanta Securities Korea Co., Ltd. to any institutional investors or third parties prior to its publication. The analyst (s) of this report or the analyst (s)' spouse does not have any financial interest in the securities of the subject company (ies) mentioned herein, nor financial interest of any nature related to the subject company (ies) (including without limitation, whether it consists of any option, right, warrant, future, long or short position), as of the publication date of this report.

NOTICE TO US INVESTORS: This research report is the product of Yuanta Securities Korea Co., Ltd., which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (US) and are not associated person(s) of any US regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a US broker-dealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with US rules or regulations regarding, among other things, communications with a subject company, public appearances, and trading securities held by a research analyst account.

Research reports are intended for distribution only to Major U.S. Institutional Investors as defined by Rule 15a-6(b)(4) of the US Securities and Exchange Act of 1934 (the Exchange Act) and interpretations thereof by the U.S. Securities and Exchange Commission (SEC) in reliance on Rule 15a-6(a)(2). If the recipient of this research report is not a Major US Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated, and/or transmitted onward to any US person which is not a Major US Institutional Investor. In reliance on the exemption from registration provided by Rule 15a-6 of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major US Institutional Investors, Yuanta Securities Korea Co., Ltd. has entered into a Strategic Partnership and chaperoning agreement with a U.S. registered broker-dealer: BancTrust Securities USA. Transactions in securities discussed in this research report should be affected through BancTrust Securities USA.
