3Q26 review: profitability decent, estimates to normalize

3Q26 review: sales disappoint, but profitability remains strong

Hyundai Rotem reported 3Q26 sales of W1,620.7bn (+0.1% YoY, +0.9% QoQ) and OP of W247.1bn (-11.1% YoY, +6.3% QoQ, OPM 15.2%), missing consensus by 10.0% and 10.5%, respectively. Sales and OP missed our estimates by 9.8% and 14.2%, respectively, as advance production in 1H26 of K2GF tanks scheduled for delivery this year reduced sales recognition in 2H26. The Aerospace/Defense & Robot/Hydrogen (AD&RH) division recorded sales of W841.2bn (-10.1% YoY) and OP of W236.0bn (-10.5% YoY, OPM 28.1%). Exports are estimated to have accounted for approximately 53% of divisional revenue. Despite unfavorable forex conditions, larger-than-expected reversals of contingency provisions following the completion of K2GF deliveries to Poland supported strong profitability (assuming a domestic OPM of 7%, export OPM was approximately 46%). With 4Q26 deliveries expected to reach approximately three times the 3Q26 volume, profitability should remain robust.

Expectations to reset lower; new orders could drive estimate upgrades

Management indicated that AD&RH sales would remain flat YoY in 2027, while profitability would weaken owing to a gap in export deliveries. Accordingly, we have lowered our 2027 OP estimate by 20.2%. Our 2027 estimates include some of the remaining 58 K2GF tanks, component orders for K2PL production to be executed in 2H27, and domestic deliveries, including the fourth batch of K2 production. Should projects in Peru, Romania, and other markets materialize during 2027, we will raise our estimates to reflect revenue recognized based on project progress. The Peru contract is likely to be signed in 1H27, following the review and approval of the country's 2027 budget in November. In Romania, related procedures, including the issuance of an RFP, are expected to proceed after the selection of a new prime minister is completed in late October.

Maintain BUY and target price of W150,000

The share price has fallen 47% YTD, reflecting order uncertainty and downward pressure on earnings revisions. With Poland's EC2 contract and follow-on projects providing downside support to earnings, we believe the stock has entered a phase where potential orders in 2027 could drive a reassessment. New orders would validate sustained tank demand and reduce reliance on a single country and product, potentially supporting a valuation rerating and upward earnings revisions.

Comments on the acquisition of Hyundai Wia's special business division

Ahead of its earnings release on Oct 19, the company disclosed its decision to acquire Hyundai Wia's special business division (defense) via a business transfer for W358.4bn. The transfer covers defense-related operating assets, liabilities, technologies, and all employees subject to full employment succession. However, land/building assets including sites and buildings within the Changwon plant were excluded from the transaction. As such, **the final acquisition price was set at W358.4bn after deducting real estate-related values from the total assessed operating value of W480bn**. The company plans to enter into a lease agreement for the existing site (**security deposit of W1.41bn, rent of W5.63bn/year for five years**) and gradually build independent production facilities, with the final business transfer scheduled for Mar 31, 2027.

The operating value of W480bn implies an EV/EBITDA multiple of 9.5x, derived via the present value of free cash flow to the firm (FCFF) over the five-year forecast period and terminal value using a perpetual growth rate of 1.0% and WACC of 9.26%. Working backward, the applied EBITDA is W50.53bn, implying that the annual EBITDA absorbed by Hyundai Rotem is W44.9bn, excluding annual plant rent of W5.63bn. Applying Hyundai Rotem's 2026E EV/EBITDA of 7.1x yields an incremental EV of W318.8bn, which could result in a dilutive effect relative to the W358.4bn acquisition price (net cash reduction).

Nevertheless, since the dilutive effect is limited and the company has limited uses for its ample cash balance (W1.9tn as of end-3Q26), the acquisition will likely **generate positive effects in terms of: 1) enhancing export competitiveness; and 2) expanding/streamlining the business portfolio.** Hyundai Wia's special business division mainly produces large-caliber artillery including gun barrels for the K9 self-propelled howitzer and main guns for the K2 main battle tank, and posted 2025 revenue of W393.1bn and OP of W45.6bn. As the company vertically integrates the core artillery of the K2 tank through this acquisition, it will likely strengthen its competitiveness in securing export orders through greater production efficiency, cost reductions, and shorter lead times. Moreover, the company plans to streamline overlapping R&D and MRO capabilities, while expanding its business portfolio into the aerospace and naval sectors including remote-controlled weapon stations (RCWS), anti-drone systems (ADS), close-in weapon systems (CIWS), and T-50 landing gear. For reference, earnings from Hyundai Wia's special business division will likely be consolidated and reported under the AD&RH business from 2Q27.
