3Q26 preview

Iljin Electric likely posted 3Q26 sales of W548.4bn (+21.8% YoY, -14.0% QoQ), OP of W58.9bn (+66.5% YoY, -18.2% QoQ), and OPM of 10.7%, in line with consensus. Earnings likely declined QoQ due to shipment scheduling, but YoY growth likely remained solid thanks to the expansion of high-margin transformer sales in North America and the impact of capacity additions. As the rising sales contribution of heavy electrical equipment and a richer North American sales mix drive company-wide profitability improvements, investors should focus on the improving business mix rather than simple top-line growth. Heavy electrical equipment OP likely expanded by 122.1% YoY, demonstrating the firm's resilient earnings fundamentals.

2027 outlook: time to position beyond capacity expansion benefits

We estimate 2027 sales at W2.52tn (+6.4% YoY), OP at W284.8bn (+12.2% YoY), and OPM at 11.3%. Heavy electrical equipment sales will likely rise to W767.6bn, with rising utilization from existing transformer capacity additions and the conversion of its North America-centered order backlog into sales driving profit growth. Currently, 2028 production slots are largely locked in and 2029-2030 orders are being filled up, implying that potential for further capacity expansions remains open as long as long-term demand persists. The firm's key investment point is rising transformer demand on power grid expansion, rather than direct US AI data center orders, and we expect the development of 500kV voltage-source HVDC transformers to provide momentum for the firm's entry into a new domestic market.

We maintain BUY and our target price of W125,000. Trading at a 2027E P/E of 20.5x, the stock is attractively valued. With post-expansion shipments and heavy electrical equipment mix improvement driving growth, expectations for beyond 2028 will likely heighten if high order visibility translates into additional capacity expansions.
