Samsung E&A (028050 KS)

Do-yub Kim
Construction/Machinery
doyub.kim@yuantakorea.com

Ultimate pinnacle of advanced tech

Initiate coverage at BUY and target price of W73,000

We initiate coverage on Samsung E&A at BUY and a target price of W73,000, derived by applying a target P/B of 2.43x to 12-month-forward BPS of W30,202. This implies an upside potential of 41% against the current share price. Our target P/B applies the upper 10% of the 12-month-forward P/B recorded when the group's semiconductor capex expansion and overseas EPC order momentum were both priced in. We estimate 2026 sales at W10.8tn (+19.6% YoY) and 2027 sales at W12.9tn (+19.1% YoY), and expect OP to increase to W977.6bn in 2026 (+23.4% YoY) and W1.16tn in 2027 (+18.9% YoY).

Surge in captive orders to lead to earnings in 2027

The foundation for earnings growth lies in group captive order volumes already secured. The advanced tech order backlog grew 2.36x from W3.0tn in 2Q25 to W7.0tn in 2Q26, accounting for 31% of the total. 1H26 new orders in advanced tech also reached W2.4tn, already achieving 119% of the full-year W2tn guidance. The company revised up its group order volume guidance from W3tn to over W7tn. As advanced tech orders convert into revenue within 1.5 to 2 years after the order placement, earnings contribution from expanded captive orders will likely materialize in earnest starting in 2027.

New energy and water to become the second growth engine

The new energy business is scaling up rapidly. Its 2Q26 sales came to W698.1bn (+146.3% YoY), rising to 26.8% of overall sales, while order backlog reached W6.6tn, 29.2% of the total backlog. Following the engineering and procurement contract for the US blue ammonia project, a Saudi Arabia industrial water treatment project drove new orders in 2Q26.

In 2026, we expect new energy revenue to reach W3tn, including W1tn from the water business. With advanced tech likely to drive earnings growth in 2027, new energy and water business expansion will likely support business portfolio diversification.

I. Target price and valuation

Resumption of earnings growth; target price W73,000

We initiate coverage on Samsung E&A at BUY and a target price of W73,000, derived by applying a target P/B of 2.43x to 12-month-forward BPS of W30,202. This implies an upside potential of 41% against the current share price of W51,800. Our target P/B applies the upper 10% of the 12-month-forward P/B recorded in June 10-July 8, 2021 when Samsung Electronics' semiconductor capex expansion and overseas EPC order momentum were both priced in.

Applying upper-bound valuation from past rerating periods

We believe that the prerequisites for a valuation multiple above the historical average of comparable previous cycles are currently in place. The advanced tech order backlog grew 2.36x from W3.0tn in 2Q25 to W7.0tn in 2Q26, and the company revised up its group captive order intake guidance from W3tn to over W7tn. In addition, we applied 2.43x, representing the upper 10% of historical rerating cycles, as overseas energy infrastructure and new energy orders are expanding simultaneously.

Increased advanced tech orders, key valuation determinator

The primary driver that will likely determine future valuations is the revenue conversion of advanced tech orders. Adding to the expanded backlog, 1H26 new orders stood at W2.4tn, already outpacing the full-year target of W2tn. Given that order-to-revenue conversion requires 1.5-2 years, earnings contributions from increased captive order volumes will likely materialize in earnest starting in 2027.

II. Earnings estimates

Recovery in 2026, continued growth in 2027

The company's sales are expected to grow from W9.0tn in 2025 to W10.8tn in 2026 (+19.6% YoY) and W12.9tn in 2027 (+19.1% YoY). OP is also projected to rise from W792.1bn in 2025 to W977.6bn in 2026 (+23.4% YoY) and W1.63tn in 2027 (+18.9% YoY). Following 2025's earnings contraction, sales and profit are likely to enter a simultaneous growth phase from 2026.

Advanced tech and new energy to drive top-line growth in 2026

Non-hydrocarbon business will likely drive sales growth in 2026. Advanced tech sales will likely grow from W2.5tn in 2025 to W4.3tn in 2026 (+68.9% YoY), and new energy sales will likely more than double from W1.3tn to W3.0tn (+122.3% YoY). Meanwhile, hydrocarbon sales will likely decrease from W5.2tn to W3.5tn. As such, the combined sales contribution of advanced tech and new energy will likely increase from 42.9% in 2025 to 67.3% in 2026, marking a decisive shift away from earnings centered on hydrocarbon to advanced tech and new energy.

Expanded order backlog to translate into earnings in 2027

Advanced tech will remain the primary earnings engine in 2027. Advanced tech sales will likely increase to W5.0tn (+16.9% YoY), while hydrocarbon sales will likely recover to W4.9tn (+38.8% YoY), with overall sales likely expanding to W12.9tn. OP will likely increase to W1.2tn, and net profit attributable to controlling interest will likely expand to W900.3bn (+27.8% YoY). With large-scale captive orders secured through 2026 will likely be recognized as sales sequentially, earnings visibility for 2027 seems exceptionally high.

III. Investment highlights

1. Advanced tech: captive orders to convert into earnings

The most important investment highlight for Samsung E&A is the sharp increase in group captive orders. Advanced tech order backlog grew 2.36x from W3.0tn in 2Q25 to W7.0tn in 2Q26, accounting for 31% of the total 2Q26 order backlog of W22.7tn. New advanced tech orders in 1H26 also reached W2.4tn, already delivering 119% of the full-year W2tn target.

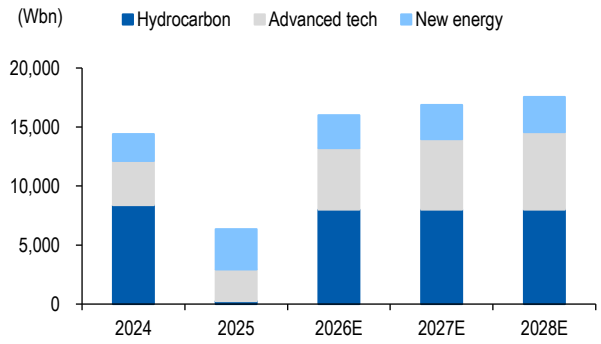

Order expansion is highly likely to continue into 2H26. The company revised up its captive order guidance from W3tn to over W7tn. Given that order-to-revenue conversion requires 1.5-2 years, earnings contributions from order volumes secured this year will likely materialize in earnest starting in 2027. This underpins our projection that advanced tech revenue will increase from W2.5tn in 2025 to W4.3tn in 2026 and W5.0tn in 2027.

2. New energy and water: to grow as new revenue engines

New energy has already shifted from a new business to a core driver of overall earnings. Its sales in 2Q26 came to W698.1bn (+146.3% YoY), accounting for 26.8% of overall sales. Order backlog also expanded to W6.6tn, representing 29.2% of the total order backlog. Full-year 2026 new energy revenue is projected to climb to W3.0tn.

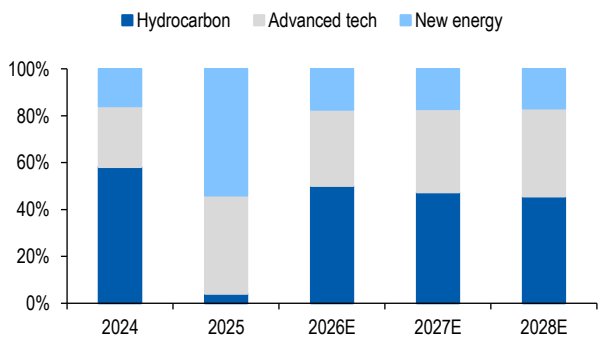

Business scope is also broadening. Following the $714mn engineering and purchase contract for the West Terre Haute blue ammonia project in Indiana, US, an industrial water treatment project in Saudi Arabia valued at an estimated W1tn drove new order intakes in 2Q26. Notably, revenue from the water business alone is expected to reach W1tn this year. It should be noted that business scope is expanding to energy transition and water treatment projects, based on the company's legacy hydrocarbon EPC capabilities.

EPS, BPS, P/E and P/B are based on controlling interest
For valuation metrics such as P/E, historical figures are based on annual average prices and estimates, on current price
For ROA or ROE, assets and equity are averages of end-of-year figures for the given year and the year prior

Analyst certification

I/We, as the research analyst/analysts who prepared this research report, do hereby certify that the views expressed in this report accurately reflect my/our personal views about the subject securities discussed in this report.

Stock and sector ratings

- **Stock ratings** include an Investment Rating (Strong Buy, Buy, Hold, Sell) based on the expected absolute return of a stock over the next 6 -12 months.
- **- Strong Buy:** Expected to return 30% or more
  - Buy: Expected to return between 15% and 30%
  - Hold: Expected to return between -15 and +15%
  - Sell: Expected to return -15% or less
- **Sector ratings** suggest 6 to 12 - month forward investment weighting of a given sector compared to its market capitalization weighting.
  - Overweight: Investment weighting is higher than the market capitalization weighting
  - Neutral: Investment weighting is equal to the market capitalization weighting
  - Underweight: Investment weighting is lower than the market capitalization weighting

Global disclosures & disclaimers

This research report has been prepared for informational purposes only; it does not constitute an offer or a solicitation of an offer to buy or sell any securities or other financial instruments. The information and data contained in this report have been obtained from sources we consider reliable; however, we make no representation that the information provided in this report is accurate or complete, and it should not be relied on as such. The recipient of this report should use his/her independent judgment regarding the sale or purchase of any securities or financial instruments mentioned herein. We disclaim any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents. This report is for our clients only. It is copyrighted material and may not be reproduced, transmitted, quoted, or distributed in any manner without the prior written consent of Yuanta Securities Korea Co., Ltd.

As of the date of publication of this report, Yuanta Securities Korea Co., Ltd. does not own 1% or more of the subject company's shares outstanding. As of the date of publication of this report, Yuanta Securities Korea Co., Ltd. does not have any special interests in the subject company.

The material contained herein was not disclosed by Yuanta Securities Korea Co., Ltd. to any institutional investors or third parties prior to its publication. The analyst (s) of this report or the analyst (s)' spouse does not have any financial interest in the securities of the subject company (ies) mentioned herein, nor financial interest of any nature related to the subject company (ies) (including without limitation, whether it consists of any option, right, warrant, future, long or short position), as of the publication date of this report.

NOTICE TO US INVESTORS: This research report is the product of Yuanta Securities Korea Co., Ltd., which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (US) and are not associated person(s) of any US regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a US broker-dealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with US rules or regulations regarding, among other things, communications with a subject company, public appearances, and trading securities held by a research analyst account.

Research reports are intended for distribution only to Major U.S. Institutional Investors as defined by Rule 15a-6(b)(4) of the US Securities and Exchange Act of 1934 (the Exchange Act) and interpretations thereof by the U.S. Securities and Exchange Commission (SEC) in reliance on Rule 15a-6(a)(2). If the recipient of this research report is not a Major US Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated, and/or transmitted onward to any US person which is not a Major US Institutional Investor. In reliance on the exemption from registration provided by Rule 15a-6 of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major US Institutional Investors, Yuanta Securities Korea Co., Ltd. has entered into a Strategic Partnership and chaperoning agreement with a U.S. registered broker-dealer: BancTrust Securities USA. Transactions in securities discussed in this research report should be affected through BancTrust Securities USA.
